Rates

Prevalence Rate: The California Health Interview Survey (CHIS) at UCLA provides the estimated prevalence of Serious Emotional Disturbance (SED) for children and Serious Mental Illness (SMI) for adults for the County of Los Angeles by Service Area. These rates are applied to the estimated population to determine the number of people in need of mental health services.

Penetration Rate: This rate estimates the number of persons served by publicly funded outpatient mental health services, excluding Fee-For-Service Providers. The Penetration Rate is calculated as: The Number of Consumers Served in Outpatient Short Doyle/Medi-Cal Facilities divided by the number of people estimated with SED and SMI.

Retention Rate: This rate reflects the number of outpatient claims received by consumers in Short Doyle/Medi-Cal Facilities in FY 2011-2012.

Age-Group Served by Providers: The age-groups served by providers are: Child/Youth, Adults and Older Adults. Providers serving Child/Youth serve consumers between the ages of 0 and 17. Providers serving Adults serve consumers 18 years of age or older.
